

# Backup Buddy Installation Guide

---

Uploading Your New Lead-Gen Theme with BackupBuddy

Follow these instructions or watch the install video by clicking the link below.

## **Install Instructions**

1. Upload the backup file & importbuddy.php to the root web directory of the destination server.

\*\*\*\*\*Do not install Wordpress on the destination server. The importbuddy.php script will restore all files, including Wordpress. \*\*\*\*\*

2. Navigate to importbuddy.php in your web browser on the destination server.
3. Follow the importing instructions on screen. You will be asked whether you are restoring or migrating. For installs on a new domain be sure to choose "Migrating".

## **Install Video**
