

# WP Twin Install Guide

This lead gen site comes with the WP Twin file all ready to go. That means you can get your site completely uploaded and formatted correctly in a matter of seconds!

**If you don't already have WP Twin you can check it out by clicking this link:**

<http://bit.ly/wp-twin-works>

This tool is a little expensive. However, it works and is a HUGE time saver. I would not recommend it if I didn't use it personally. It also comes with a 30-day money back guarantee so it may be worth it to give it a try and see how much easier using this lead gen sites will be.

## **Basic Install**

Going over the WP Twin cloning process would be overkill because everything is explained in the package that you purchased. It's also very easy. Once you do it once it's really a piece of cake.

But here's a quick run down.

1. Install Wordpress on your keyword rich domain. Using cPanel is easiest.
2. Upload the WP Twin Deployment file that came with your purchase of WP Twin to the root directory of your domain.
3. Upload the .wpt file that you received with your purchase of this lead-gen site. It is located in the 'WP Twin' folder inside the 'Lead-gen Theme Files' folder.
4. Follow the install instructions provided by WP Twin to get your site uploaded and activated.
5. Use the login details that we provided in the 'WP Twin Login Details.txt' file.

## **Login Details**

Once you upload everything and you're ready to login to your WordPress Admin area for the first time use the login details below. NOTE: After you login for the first time be sure to not only change/update your email address but be sure to change your password as well.

User Name: admin

Password: 1234abcd
